WHO WE ARE

About IEWAH

IEWAH Technical Services is a UAE-based **home automation and smart-building solution provider**, delivering integrated electrical works, intelligent automation and security across Abu Dhabi and Dubai. From luxury villas to hospitality and commercial spaces, we turn buildings into connected, comfortable and energy-efficient environments — covering lighting, climate, security and full home automation.

With technology at our fingertips, we believe projects should never be done the hard way. We apply years of cross-vertical experience in the electrical and electronics industry to deliver every project hassle-free — consulting and value-engineering each client individually rather than forcing a single solution onto every site.

The result is work that is **minimalist in nature, functional in essence and aesthetically pleasing** — built to perform in the demanding climate and standards of the Gulf.

STANDARDS

ISO-compliant installations

Our Vision

To transform homes and businesses into secure, smart and energy-efficient environments — where technology works quietly and reliably in the background.

Our Mission

To thrive by delivering customized, optimized solutions through the highest standards of consultation and value engineering — enhancing safety, comfort and efficiency for every client.

CLIENT SUPPORT

— WHAT WE DO

Our Expertise

Home automation at the core, with security and integration built around it. Whether a single smart villa or a multi-building campus, IEWAH unifies every system into one seamless, intelligent experience.

Security Systems

01

CCTV surveillance, access control (ACS), gate barriers, sliding gates and doors, intercom and intruder alarms — scalable from a single entrance to an entire estate.

Automation

02

Lighting control (LCS), building management (BMS), guest room management (GRMS) and full home automation — programmable, app- and voice-controlled, energy-aware.

Integrated Solutions

03

Seamless integration of security and automation across protocols and vendors — harmonized into one platform for optimal functionality and a single, intuitive user experience.

WHY INTEGRATION MATTERS

- ✓ One interface for every system
- ✓ Lower energy and running costs
- ✓ Scales with the project

— PROTECT · MONITOR · CONTROL

Security Systems

Surveillance and access solutions designed for residential and commercial environments, with the ability to trigger a chain of automated responses from a single event.

CCTV

Surveillance

High-definition cameras with advanced monitoring and easy, secure remote access from any device.

Access Control

ACS

Secure, customizable systems to manage and audit access for authorized personnel only.

Gates & Barriers

Automated Entry

Gate barriers and sliding gates engineered for efficient, secure entry and exit control.

Sliding Doors

Smart Access

Intelligent door systems combining everyday convenience with robust security features.

Intercom & Intruder Alarm

Communication & Detection

Reliable communication networks and intruder alarm systems tailored for homes and businesses — fully integrable with surveillance and access.

KEY BENEFITS

- ✓ Enhanced safety & live monitoring
- ✓ Scalable for small & large projects
- ✓ Integrates with automation

— COMFORT · EFFICIENCY · CONTROL

Automation

Intelligent control of light, climate and energy — programmable scenes, real-time analytics and full compatibility with IoT devices and voice assistants.

Lighting Control Systems LCS

Energy-efficient, fully customizable lighting with programmable scenes for app or voice control. We integrate DALI, KNX, Buspro and DyNet for residential and commercial projects, with occupancy sensing for guaranteed energy savings.

Building Management Systems BMS

Centralized control of HVAC, lighting and energy usage, with real-time alerts and analytics for continuously optimized building performance.

Guest Room Management GRMS

Hospitality-grade systems that redefine luxury while optimizing energy. Scenarios such as Welcome, DND, Clean-My-Room and Away coordinate lighting, curtains and temperature around each guest.

Home Automation SMART HOME

Unified smart-home integration for lighting, climate, security and entertainment — minimalist, intuitive and fully compatible with IoT devices and voice assistants.

— THE FULL STACK

More Capabilities

Beyond security and automation, IEWAH delivers the complete low-voltage and infrastructure scope — so one partner can carry a project end to end.

Audio-Visual

AV / MOIP

Solutions from auditoriums and home cinema to advanced Media-over-IP — 4K transmission to any number of displays, managed remotely across meeting rooms, smart classrooms and PA/paging.

ICT Infrastructure

Cabling · PABX · Network

Passive and active IT systems for a complete telecommunication infrastructure — structured cabling, PABX and networking for commercial and residential projects.

Electrical

LV Design & Execution

Full low-voltage design and execution — load schedules, DB details, load and cable calculations for mid-sized and retrofit projects.

Energy Management

EMS

From standalone to complex systems — set energy limits and policies and meet them, reducing waste and running cost across any building type.

ONE PARTNER, WHOLE PROJECT

- ✓ Single point of accountability
- ✓ Coordinated cross-system design
- ✓ Fewer interfaces, fewer surprises

FROM BRIEF TO HANDOVER

How We Work

A disciplined, four-stage approach that keeps every project clear, accountable and on time — with value engineering at every step.

1

Consultation

We start by understanding your needs, goals and constraints — so the solution is tailored to you, not forced from a template.

2

Design & Planning

Customized layouts, schematics and system selection engineered for seamless integration and clean, future-proof delivery.

3

Implementation

Expert installation, configuration and commissioning to ensure every system runs smoothly from day one.

4

Support & Maintenance

Ongoing support and maintenance contracts to keep systems efficient — with round-the-clock assistance when it matters.

BUILT FOR EVERY ENVIRONMENT

Where We Work

From private villas to operating hotels, our solutions adapt to the demands of each setting — and to the heat, humidity and standards of the UAE.

Luxury Villas

Full home automation — lighting, climate, security and entertainment — delivered as one elegant, easy-to-use system.

Commercial Offices

Integrated security and access-control systems tailored to business operations and compliance needs.

Hospitality Projects

GRMS and BMS implementations that create seamless, efficient and memorable guest experiences.

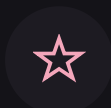

Residential Buildings

Full ELV systems across multi-unit developments — enhancing security, convenience and energy efficiency.

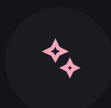

— THE IEWAH DIFFERENCE

Why Choose Us?

Proven Expertise

A track record of delivering reliable, sophisticated systems on landmark UAE projects.

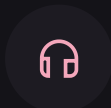

Customization

Tailored solutions engineered around your specific requirements — never one-size-fits-all.

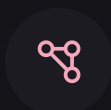

Quality Assurance

Premium materials and industry-standard, ISO-compliant installations built to last.

Dedicated Support

Comprehensive maintenance services and round-the-clock client assistance.

Integrated Technologies

Different systems harmonized into one platform for maximum efficiency and simplicity.

— OUR TEAM

Certified & Capable

A skilled group of engineers, technicians and project managers — certified in automation and security systems, and ready to take ownership of your project from brief to handover.
